FFA Drug Interaction Analysis — Non-Opioid ED, Age 65–74
(FFA CatBoost Model, 8_ffa_analysis/results/model_evaluation/, 2019 Holdout)

(A) Drug Co-Prescription Network
(edge = ≥10% patients co-prescribed; node size ∝ FFA |SHAP|;
red = risk-↑, blue = protective; n = 2,000 sampled)

(B) SHAP Interaction Network
(edge = |Pearson r| ≥ 0.08 across sampled patients;
red = synergistic co-SHAP, blue = antagonistic; 65–74 band)
